Assistant Purchasing Agent*

This Addendum forms a part of the contract documents and **modifies** the original RFP documents as noted below:

***The following questions were asked of the aforementioned bid:***

**Question 1:**

Are the Bid Bond and Performance Bond absolutely required in that the installation and configuration portion of the project will be completed in less than 30 days?

**Answer:**

Yes, due to the fact that the Bid Bond and Performance Bond were apart of the initial Bid Specification, they will be required.

**Question 2:**

Is it possible that a bank letter of credit can substitute for the Bid and Performance bond provided that we also offer to agree to a payment arrangement whereby a significant retainer is withheld until the job is completed and accepted?

**Answer:**

No, Fulton County will not accept a Letter of Credit as substitute for the Bid and Performance Bond.

**Question 3:**

Please confirm that, in addition to the Manufacturer's Warranty, there is also a requirement for a service level agreement to include a 2 hour response time for trouble calls.

**Answer:**

Yes, a two (2) hour response time is correct. Please refer to Addendum 1 question number (29).

**Question 4:**

Should we also include an optional, on-site event management period of 2 weeks whereby support technicians are provided to assist the Sheriff's personnel with call setups and other operations?

**Answer:**

That will be left up to the bidder, however, we would suggest that you place that in your bid as optional due to the fact that Fulton County didn't ask for it in the bid specification. Also, this could possibly drive up your price in what may turn out to be a very competitive bid.

**Question 5:**

In Addendum #1, question 5, you answered that multiple control stations were required. How many control stations are initially required?

**Answer:**

Two (2)

**Question 6:**

For the LAN fiber cabling and switch hardware infrastructure between the jail and the trailer, will there be a dedicated path/virtual path for video call traffic or will this path be shared with other Fulton data traffic? With the possibility of 16 simultaneous, full duplex calls from the trailer to the jail, what minimum bandwidth can we rely on?

**Answer:**

There will NOT be a dedicated fiber path between the jail and the trailer. However, QOS will be implemented to prioritize the video traffic. There will be a minimum of 1 Gbps available for the video calls.
